

MINUTES OF GEOGRAPHIC AREA STAFF MEETING, 13 DECEMBER 1954.

25X1A9A PRESENT: Messrs. [REDACTED]

25X1A9A

1. [REDACTED] commented that the DCI has expressed interest in some economic and geographic intelligence reports that he happened to see. Some procedure should be set up for selecting the best geographic reports and sending retention copies to the DCI. The OAD is investigating the distribution of ORR reports to the DCI. The DDI sees all reports when published and St/PC/RR maintains a file of ORR reports in the DDI's office for briefing purposes. A more selective collection probably should be maintained in the DCI's office.

25X1A9A [REDACTED] will select some of the best geographic reports to be sent to the DCI. [REDACTED] asked about maps. Apparently the DDI and the DCI don't see maps except that the DDI sees those contained in reports. [REDACTED] decided that he should select appropriate maps as they are published and route to the DDI and possibly the DCI.

25X1A9A

25X1A9A 2. [REDACTED] reported on the CIA regulation concerning the mission and function of D/GP that is being formulated. A lengthy initial draft was written by [REDACTED]. Another draft was written by Mr. [REDACTED] and this was reworked by MS/DDA. [REDACTED] is now refining the definition of "photo intelligence." The group discussed the need for issuance of such a regulation. The work on the regulation was instigated by the IG's thought that D/GP needed publicity. [REDACTED] followed up on this with various ideas, and the AD/RR then asked MS/DDA to make an analysis of the mission and function of D/GP with the idea of possible issuance of a CIA regulation on the subject.

25X1A9A

25X1A9A

25X1A9A 3. [REDACTED] asked the division chiefs about their survey of book holdings that are not cataloged by the CIA Library. D/GC, D/GL, and D/GP reported that they had no holdings of interest to the CIA Library, and D/GG has finished its survey and will send the results to Ch/G.

25X1A9A

25X1A9A

4. [REDACTED] asked about progress on the Geographic Area and ORR exhibits. [REDACTED] reported that a meeting will be held in [REDACTED] office to discuss an integrated ORR exhibit.

[redacted] [redacted]

The diagram consists of 10 horizontal bars arranged in a sequence from top-left to bottom-right. Each bar is a rectangle with a black outline. The bars vary in their vertical position and horizontal extent. The sequence starts with a bar at the top left, followed by a shorter bar to its right, then a bar further right and slightly lower. This pattern continues with bars generally moving downwards and to the right, with some variations in length and spacing. The final bar is at the bottom center.

25X1A9A

A diagram showing a 25x1 grid. The grid is represented by a horizontal line at the top and a vertical line on the left. Six rectangles are placed within the grid. The rectangles are arranged in two rows of three. The top row has three rectangles, and the bottom row has three rectangles. The rectangles are labeled with their dimensions: 25X1, 10X1, 10X1, 10X1, 10X1, and 10X1. The 25X1 rectangle is the largest and is located on the right side of the grid. The other five rectangles are smaller and are located on the left side of the grid.
